Haven Paris

This November, **Haven is coming to Paris!** Haven is a game jam held simultaneously in 200 cities around the world. **Thousands of teenagers** will be introduced to tech by designing **their own video game, from scratch.**

Funding the venue, food and prizes lets every participant join this event for free, whether or not they have experience. We would be very grateful for your support in making this possible.

Haven (haven.hackclub.com) is run by **Hack Club**, a 501(c)(3) nonprofit that has helped more than **100,000 teenagers** around the world discover the world of tech. You can read about it in The Wall Street Journal, CBS News and NASA.gov.

Our Mission

We want to **inspire the next generation of creators** around the world by introducing them to technology in a fun, collaborative way. Game jams like Haven give young people a unique chance to **learn to code** in a pressure-free environment. Every teenager will leave Haven with a new friendship, a project they're proud of and unforgettable memories.

If you'd like to help us:

Here are a few sponsorship options!
You don't have to choose all of them

Want to host us?

You're funding...

- Free meals and snacks for all participants
- Prizes and surprises
- The best hackathon!

If you'd like to host us...

Thank you so much for your generosity! To make sure our event is a success, here are a few important points:

- Date and times: From morning to afternoon, on Saturday 14 and Sunday 15 November. Unfortunately, we can't be flexible, as the event has to take place at the same time as the other events around the world.
- Target audience: Middle and high school students (13–18) who want to learn to code! We expect around forty participants.
- Budget: Given our very limited budget, we can't afford to pay for the use of your space. You can consider it a very generous donation, and we're open to discussing what we could offer you in return!
- Food: We plan to buy all the food we need, but we need a water point and bins.
- Hygiene: We need toilets!
- Supervision: Our audience is mostly under 18, so adults will supervise the entire event. We will make sure participants respect the venue that hosts us. All organisers and participants commit to following our Code of Conduct.
- Technology: We need wifi and a 5G network able to support around a hundred devices at the same time, as well as power outlets to charge about twenty devices (laptops, phones, tablets...). A video projector or a large TV, as well as microphones, would be appreciated but are not required.
- Other: If we've forgotten anything, don't hesitate to let us know by email or phone. Our main goal is for this event to be a success for everyone, participants and sponsors alike.
